Viewing a Quiz from a Student’s perspective

Go to the Quiz tool from under the Assessments tab at the top.

Once you have chosen the quiz you wish to open, click on the action menu at the end of the quiz name.

Select Submission. And find the Attempt.

There may only be one submission. When you click on it the test will open and whatever your Instructor has allowed you to see you should be able to see.

If you have contacted your Instructor and they have set up the submission correctly, you should restart your computer and then contact the Helpdesk at 912.344.2518 for additional assistance.
